PROFESSIONAL SUMMARY

Frontend-Focused Web Developer with hands-on experience building responsive, scalable, and production-ready web applications using modern technologies including React, Next.js, Angular, TypeScript, JavaScript (ES6+), HTML5, and CSS3. Skilled in developing reusable component-based architectures, integrating RESTful APIs, and building cloud-connected applications using services such as Firebase and Firestore. Experienced with modern frontend development workflows, version control, testing, and collaborative Agile environments using Git and GitHub. Adaptable and quick to learn emerging technologies, with a strong ability to translate business and user requirements into clean, maintainable, and high-quality software solutions. Based in Accra and available to start immediately.

TECHNICAL SKILLS

- Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript, SCSS
- Frameworks & Libraries: Angular, React, Tailwind CSS, Bootstrap, PrimeNG, Material UI
- Backend & Cloud: REST API integration, Firebase/Firestore, AWS Cloud fundamentals, Agile/Scrum workflows
- CI/CD: Github Actions, Jenkins
- Concepts: Responsive Design, Cross-Browser Compatibility, Performance Optimization, Component-Based Architecture, SEO Basics, UI/UX

PROFESSIONAL EXPERIENCE

Junior Frontend Engineer — NICS IT and Business Solutions *Jan 2025 – Present*

- Built and maintained 10+ reusable, responsive UI components using Angular, TypeScript, HTML, and CSS
- Improved application load time through performance optimization techniques including efficient component rendering and lazy loading
- Delivered 5+ production-ready features in live applications, working directly with stakeholders to translate business requirements into technical solutions
- Reduced UI-related bugs through systematic debugging, code reviews, and improved testing practices
- Collaborated via Git/GitHub with branching workflows and version control best practices in an Agile team environment

Frontend Developer — Doltech Ltd. *Oct 2024 – Jan 2025*

- Refactored UI components to reduce code duplication, improving long-term maintainability and scalability
- Identified and resolved performance bottlenecks in collaboration with senior engineers
- Built a real-time booking application using Angular and Firebase, with live data updates and authentication flows
- Implemented responsive UI components from design specifications, contributing to feature development and bug resolution
- Consumed REST APIs to integrate dynamic data into the application interface

PROJECTS

Passio — Transport Payment & Management System — pasio.staging.com | github.com/bash/pasio

- Designed and built a full-stack web application for a transport association covering ticket issuance, bus rotation queues, driver management, parcel tracking, and multi-role access (admin, cashier, driver, passenger)
- Integrated Firebase/Firestore as a real-time cloud backend; used Firestore transactions to prevent double-booking and race conditions
- Implemented NgRx state management with effects and selectors; built REST API-style data flows between UI and backend services
- Built with Angular, TypeScript, Tailwind CSS, and PrimeNG — full ownership from architecture to deployment

Online Barbershop Booking Application — online-barbershop-project-1.netlify.app | github.com/Alaska-gh

- Developed a real-time appointment booking platform with Firebase integration and component-based architecture; deployed and publicly accessible

Personal Portfolio Website — yussifbashiru-portfolio.netlify.app | github.com/Alaska-gh

- Designed and built a performance-optimized, accessible portfolio demonstrating front-end fundamentals and attention to UX

EDUCATION

HND in Computer Network Management

Koforidua Technical University, Ghana | 2020 – 2023
